BM25 over DOCX/PDF/CSV

1 Prerequisites

Requirement	Version	Check
Python	3.11+	python --version
pip	any	pip --version
OpenAI API key	—	platform.openai.com

2 One-Time Setup

```
cd c:\BristleCone\Kinaxis-agent-build

python -m venv unified_mcp\venv
unified_mcp\venv\Scripts\activate # Windows
# source unified_mcp/venv/bin/activate # Mac/Linux

pip install -r unified_mcp\requirements.txt
```

3 Configure Environment

Create unified_mcp\.env then export before running:

```
# Required
OPENAI_API_KEY=sk-...

# Optional: Serper.dev instead
WEB_SEARCH_BACKEND=serper
SERPER_API_KEY=your-serper-key

# Optional: OpenAI model tuning
OPENAI_SEARCH_MODEL=gpt-4o-mini-search-preview
OPENAI_SEARCH_CTX=medium # low | medium | high
```

Windows CMD: set OPENAI_API_KEY=sk-... PowerShell: \$env:OPENAI_API_KEY="sk-..." Mac/Linux: export OPENAI_API_KEY=sk-...

4 Run & Test

```
# Full suite – spawns server, calls all 3 tools
python unified_mcp\test_kinaxis_mcp.py

# Specific groups
python unified_mcp\test_kinaxis_mcp.py --only list
python unified_mcp\test_kinaxis_mcp.py --only list,doc
python unified_mcp\test_kinaxis_mcp.py --only web
```

```
# Show full tool output
python unified_mcp\test_kinaxis_mcp.py --verbose
```

```
Expected output (all keys set)

[PASS] Tool present: web_search
[PASS] Tool present: open_url
[PASS] Tool present: doc_search
[PASS] Basic query -- 3.2s 1842 chars
[PASS] Fetch example.com -- 0.8s 612 chars
[PASS] Supply chain query -- 0.4s hits=5
Summary: 10 passed 0 failed of 10
```

5 Add Your Own Documents

Drop files into unified_mcp/reference_docs/ — indexed automatically at server startup.

Format	How it's chunked
.docx	By Word heading structure (H1 / H2 / H3...)
.pdf	One chunk per page
.csv	One chunk per row

6 Connect to Claude Desktop

Edit %APPDATA%\Claude\claude_desktop_config.json

```
{
  "mcpServers": {
    "kinaxis": {
      "command": "C:\\...\\unified_mcp\\venv\\Scripts\\python.exe",
      "args": [
        "C:\\...\\unified_mcp\\kinaxis_mcp_server.py"
      ],
      "env": { "OPENAI_API_KEY": "sk-..." }
    }
  }
}
```

Restart Claude Desktop after saving. The kinaxis server appears in the MCP tools panel.

7 Connect to Claude Code CLI

Kinaxis MCP Server

doc_search

BM25 over DOCX/PDF/CSV

```
claude mcp add kinaxis \
--command "python" \
--args "unified_mcp\kinaxis_mcp_server.py" \
--env "OPENAI_API_KEY=sk-..."

claude mcp list # verify registration
```

```
■ ■ ■ Pine Chemicals.pdf
■ ■ ■ requirements.txt
■ ■ ■ CHEAT_SHEET.pdf
```

8 Web Search Backends

Backend	Env vars needed	Best for
OpenAI (default)	OPENAI_API_KEY	Summarized results, citations
Serper.dev	WEB_SEARCH_BACKEND=serper SERPER_API_KEY	Raw Google results, more links

9 Troubleshooting

Symptom	Fix
ModuleNotFoundError: mcp	pip install -r requirements.txt
OPENAI_API_KEY is not set	Export the var or add to Claude Desktop env config
ModuleNotFoundError: openai	pip install openai>=1.60
Doc index not available	Check reference_docs/ has .docx/.pdf/.csv files
Server crashes on startup	Run python kinaxis_mcp_server.py directly and read stderr
No doc search results	Try broader query terms; verify corpus has relevant content

10 Folder Structure

```
unified_mcp/
■ ■ ■ kinaxis_mcp_server.py <- run this
■ ■ ■ test_kinaxis_mcp.py <- test client
■ ■ ■ doc_retrieval_index.py <- BM25 engine
■ ■ ■ serper_client.py <- Serper backend
■ ■ ■ reference_docs/ <- drop docs here
■ ■ ■ Kinaxis RFP.docx
■ ■ ■ Kraton Requirements.csv
```
